DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 6/11/2008 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 39-60 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mittendorf (US Patent 6262112 & 6573278) and WO 98/037061.
5. Mittendorf and the WO teach compounds such as

col 13 line 50 of '112. Quinoline is allowed for

66 A A

the naphthalene as shown in table III col 51

6. The difference between the instantly claimed compounds and the prior art compounds is the attachment between the quinoline and the -O-Phenyl NHSO₂-Phenyl moiety is through the 5-, 6-, 7- or 8- positions on the quinoline and not the 3-position as is instantly claimed.
7. However, it would have been obvious to one of ordinary skill in the art at the time of the invention to make the quinoline compounds connected through another part of the quinoline compound with the reasonable expectation of getting compounds having the same or similar activity. Rationale: The claims would have been obvious because the substitution of one known attachment for another would have yielded predictable results to one of ordinary skill in the art at the time of the invention.
